PROFILE

I design interfaces in Figma and build them in React – one person from concept to production, so nothing gets lost in handoff.

One year of professional design experience at Glion Doublerock, designing sublimation sportswear for corporate clients, running clubs and boxing gyms. The company set a KPI of 30 designs per month; I delivered 44 in my second month.

Four live projects built and deployed. I use AI tools daily and verify every line I ship.
