PROFILE

Frontend Developer transitioning from graphic design. One year designing for corporate clients gives me an eye for detail and an understanding of how a design should translate into working code. I have built and deployed three live projects using React, JavaScript and CSS, and I use AI tools daily as part of my development workflow. Looking to join a team where I can learn from code review and grow into a dependable frontend engineer.

TECHNICAL SKILLS

- **Frontend HTML5:** CSS3 (Flexbox, Grid) · JavaScript (ES6+) · React
- **Tools Git:** GitHub · Vite · Vercel · ESLint · Chrome DevTools
- **Design Photoshop:** Illustrator · UI/UX · Responsive Design
- **AI Tools:** Daily use for code review and debugging – I verify and can explain every line I ship
